Key Benefits

- Workflow boosts personal productivity
- Automated heads-up display of key data
- New colour schemes
- Visual planning boards
- Powerful web publishing tools
- Fully integrated mobile solutions (Mobile Warehouse, Sales, Service)
- World-leading backup & recovery systems

In the rapidly changing business world, there's one thing you can be sure about: Greentree will be at the forefront, offering innovative technology solutions. As proof of this, we present Greentree 3D. Not only does it add a stunning array of visual enhancements; there's also a new range of capabilities that continue to ensure Greentree's customers are always ahead of the competition, and primed for business.

Greentree's Workflow desktop anticipates the information that you require at any time.

3D LIVE

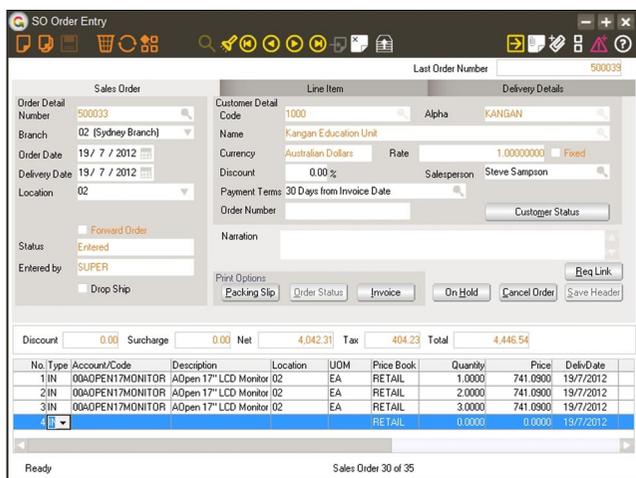

It's hard to put 3D Live into words – seeing is believing how dynamic it is – but let's see if we can paint you a picture.

It's a brilliant enhancement of Greentree's Workflow desktop that anticipates the information you require at any time, and delivers it, without you having to go searching for it.

3D Live gives access to live data related to whatever you're dealing with, whether it's a customer, an inventory item, account details or work in progress. Everything you need to know is displayed in multiple panels. Think of it like the heads-up visual display, first developed for fighter pilots so they could view key data without having to look down at their instruments. You can pre-define which pieces of

information you want to see, and they'll open automatically. If you want to see more, the relevant panel expands with a single click.

Let's say an order comes in for a particular product that you have in stock. When you click on that item in your inventory, you can have panels open that show you how many you have in stock, how many customers have orders for them, and which orders are despatched or pending. You can even have an image displayed of the item concerned. You can then fill that customer's request, order replacement stock, and initiate an invoice – all the relevant panels in front of you will update.

Powerful business software doesn't need to look bland.

With a customer's file you can see such information as the goods they've ordered over any specific period, whether their accounts are up to date, or what orders they have pending.

Colour coding enables you to prioritise whatever information is most important to you. And for even better productivity, 3D Live works brilliantly on multiple monitors.

With 3D Live, Greentree is helping to make every employee even more productive.

GREENTREE SECURE

In today's (largely) paper-free world, a system crash can cause serious losses. An electronic document, once lost, is gone forever. That's why any smart business doesn't just need reliable backup; it needs to be sure it can recover its entire system and get back to work quickly. With Greentree Secure, recovery can be instantaneous. [Read more](#)

3D TECHNICOLOUR

The functionality is key with business software, but why should it look bland? We've added 3D Technicolour to the desktop, available in two shades: Audacious Orange, for the fashion-conscious, or New Blue, if you prefer the same colour as most other ERP products.

3D - NEW FUNCTIONALITY

3D incorporates a huge range of new functionality recently released in Greentree. Here are just a few examples:

CRM

We've made some major changes to CRM, enabling the easy importing and de-duplicating of data. There is no need to store and maintain mailing lists externally. It means that your email or postal lists are always accurate and up to date, and available in CRM.

We've added a host of other capabilities that are just part of the ongoing process of making your information as easy as possible to access and use. They include advanced search and integrated spell checking, plus the usual responsiveness to various legislative and taxation changes that affect all businesses.

Supply & Distribution

Our Warehouse Management suite includes [Warehouse Bin Management](#), enabling trouble-free picking and packing, and [Mobile Warehouse Operations](#), which allows staff to pick items on the move, updating orders and information in real-time. Read here what one happy Greentree customer has to say about [Warehouse Management](#). E-commerce is the life blood of businesses of all size, and customers expect easy, secure payment options when buying on the web. Greentree 3D fully supports payment card processing and encryption standards. Read more about [Greentree Supply Chain & Distribution](#).

Visual Planning Boards

For management of day-to-day operations, Greentree's new visual planning boards provide real-time information on just about every hands-on business action. At a glance you can see what jobs staff are doing, allocate new tasks to those who are free, plan job, service and leave requests, and be notified instantly of changes. Orders and processes can be processed and tracked, and the boards can even monitor staff in the field by linking with mobile devices.

Job Cost

Greentree has made job costing a breeze with date based price books, which allow you to set up new pricing structures in advance, and job cost inventory advanced pricing, which offers highly configurable pricing options. Greentree's Job Cost module can also interface with Microsoft Project, allowing you to update information in both. Read more about Greentree [Job Cost](#).

WebView

Greentree WebView is a powerful publishing engine that allows anyone else you wish to view any Greentree information via a web browser. WebView Financial Reporting allows you to define the structure of your financial reports and publish them to authorised users, who can also drill down for further information. Read more about Greentree [WebView](#).

Mobile Applications

Along with Mobile Warehouse (see above), we've also launched Greentree's Mobile Sales Management and Mobile Field Service modules. They give staff in the field the ability to raise sales orders and provide quotes immediately, or be despatched to new job orders promptly, then return invoice details for processing as soon as a job is complete. Mobile devices can also link with the visual planning boards (see above).

3D just goes to show that Greentree has one focus: to help companies be primed for business.

WHY GREENTREE?

MANY SOFTWARE PACKAGES COME WITH ADD-ONS, COMPROMISES AND HALF-HEARTED SOLUTIONS.

Greentree believes you need the reassurance of business software that is both comprehensive and integrated, breaking down barriers and powering you to get on with business.

Responsive and flexible, Greentree provides you with a wide variety of modules and sub-modules rarely found in other packages. You switch on the pieces you need, effectively matching the system to fit your business. As your business evolves, Greentree grows with you.

Exploit its accuracy in business metrics; challenge its capability to deliver insightful information. Greentree eradicates long, complicated tasks and effortlessly manages change, to help grow business potential.

Whatever the need, Greentree gives you choices that are cost-effective and proven. Thousands of companies, large and small, have at their fingertips Greentree's simple, smart thinking that empowers better decisions, better prospects.

And, with a partnership network that spans many countries, Greentree is totally accessible. Your unique needs will drive the way Greentree and its partners respond to you. If the only thing missing from this equation is your business, then get in touch – after all, three heads are better than one.

GET READY TO BE PRIMED FOR BUSINESS.
