KEY BENEFITS

- Multiple consolidation levels
- Improve reporting accuracy
- Eliminate conversion errors
- Centrally managed, collaborative processes
- Reduce the need for local accounting expertise
- Flexible consolidation framework
- Manage business profitability across foreign exchange

Making sense of International Financial Reporting is a challenge. The pressure resulting from regulatory requirements such as the Sarbanes-Oxley Act and IFRS creates a large burden for many organisations. These challenges can be relieved with the streamlined Greentree consolidations process providing a transparent and collaborative approach to producing accurate group reporting that is easily validated and shared across the business.

Spreadsheets cost time and money

Managing your consolidations in spreadsheets, can waste valuable time, risk potential errors that are difficult to track down and result in unplanned delays and costs.

When operating across accounting jurisdictions, these can lead to missed reporting deadlines with serious consequences to overall group reporting and potentially result in penalties.

Damaged confidence in your business

Complying with international accounting standards is an important step in establishing investor and market confidence. Investigations resulting from erroneous reporting can result in diminished investor confidence, withdrawal or even delisting from stock exchanges.

Inaccurate management information

Having the right information to effectively manage your business is vital to maximising profitability and shareholder returns. Without accurate, current data, modelling and reporting may be misleading.

Currency fluctuations can also have a huge impact on the accuracy of management information and can make the difference between planning for a profitable outcome or facing an unexpected loss.

“Greentree has given us the confidence of operating in a best practice financial management and reporting environment. This has enabled us to raise the bar on workflow and office efficiency.”

David Jones, Project Accountant,
UK Highway Management Services

GREENTREE CONSOLIDATIONS & TRANSLATIONS SOLUTIONS

Multiple consolidation levels

Consolidate simple two level entities right through to highly complex, multi-layered structures requiring multi-level rollups or consolidation paths.

Improve reporting accuracy

Translating foreign exchange rates and consolidating international accounts is made easy and extremely reliable by avoiding the inconsistencies found in simplistic spreadsheet based systems.

With Greentree's Consolidations and Translations modules data cannot be misplaced, correct formulae are built in and exchange rates are selected automatically. All of which means your reporting is more accurate than ever.

Eliminate currency conversion errors

Costly conversion errors are eliminated using the power of Greentree's flexible exchange rate management function. These can be established according to your business rules and can include average, spot, budget and closing rates along with any other user-defined reporting rates that you specify. All of which gives you the confidence to report and plan based on conversion rates you can be sure of.

Centrally managed, collaborative processes

The entire consolidations process can be managed from one central location giving both child and the parent organisations visibility of the consolidations process bringing the different levels closer together.

This improved transparency has the added advantage of child organisations being more likely to take responsibility for the timeliness of their own reporting if they are able to view the status of the entire group's submissions.

Reduce the need for local accounting expertise

Reduce your costs by focussing on simple data entry at the local level and let Greentree manage the process of intercompany eliminations, allocations, currency translations and minority interest calculations resulting in accurate consolidations.

Flexible consolidation framework

The combination of built-in period mapping, account mapping, historic accounts and multi-level consolidation within the Greentree consolidation framework ensure you have the flexibility to report in the way that fits your business requirements while ensuring best international accounting practise.

Consolidation collates all child accounts into a separate company set up for the specific purpose of consolidated reporting and is a required format in many countries.

Manage business profitability across foreign exchange

Greentree's Consolidations and Translations modules can be configured to your organisation's policies. Currency rates can be as accurate as you require to reflect real time variations and allow you to effectively manage the fluctuations of foreign exchange accounting.

Manage Consolidations by entity and period

KEY FEATURES

Greentree Consolidations and Translations module is compliant with International Accounting Standards:

- IAS 27 Consolidated and Separate Financial Statements
- IAS 21 The Effects of Changes in Foreign Exchange Rates
- IRFS Business Combinations

The key features of this module include:

Consolidations

Consolidate multiple accounts for financial reporting. Includes multi-level consolidations.

Period Mapping

Handle different year ends between related companies with confidence.

Account Mapping

Automatically group accounts according to rules you establish.

Manage Eliminations

Process the elimination of inter-company transactions.

Balance or Transaction

Consolidate at summary or transaction level depending on your specific requirements.

Translations Only Module option

For businesses wanting simple currency conversion

Blanket or Granular Translation Decisions

Specify summary or transaction and rate type preferences at General Ledger account level.

Multiple Foreign Currencies

Integrate as many currencies as you need.

Foreign Currency Reserves Management

Handles foreign currency translation reserves automatically.

Translation Rates Overrides

Override system default rates at the time of translation if needed.

Dynamic Currency Rate Updating

Automated inward data feeds ensure the rates being used are totally current.

Multiple User-defined Financial Reporting Rates

On top of the existing average, spot, budget and closing rates, set your own specific rates for financial reporting purposes.

Historic Accounts Exchange Rates

Value Fixed Assets at historic rates to comply with international accounting standards.

Tiered Access Security

Create and control user access according to tiered rules to maintain system security.

“Greentree is also a powerful tool for month-end accounts. Our information is clear, consolidated and our management team gain so much more from it now.”

Victor Yukich, Managing Director, Eurotec Instruments

Audit Trail

All actions are tracked back to users for full audit trail reporting. Transactions posted as General Ledger journal or batch edit listings.

Export Translations

Translations are easily exported into Excel for further analysis.

Flexible Rates

Exchange rates can be set to be different across different account types e.g. Profit and Loss or Balance Sheet, or to change across time.

Reporting Tools

Use Greentree's F.R.E.E. functionality links to your accounts modules to put out data for further reporting and analysis.

WHY GREENTREE?

MANY SOFTWARE PACKAGES COME WITH ADD-ONS, COMPROMISES AND HALF-HEARTED SOLUTIONS.

Greentree believes you need the reassurance of business software that is both comprehensive and integrated, breaking down barriers and powering you to get on with business.

Responsive and flexible, Greentree provides you with a wide variety of modules and sub-modules rarely found in other packages. You switch on the pieces you need, effectively matching the system to fit your business. As your business evolves, Greentree grows with you.

Exploit its accuracy in business metrics; challenge its capability to deliver insightful information. Greentree eradicates long, complicated tasks and effortlessly manages change, to help grow business potential.

Whatever the need, Greentree gives you choices that are cost-effective and proven. Thousands of companies, large and small, have at their fingertips Greentree's simple, smart thinking that empowers better decisions, better prospects.

And, with a partnership network that spans many countries, Greentree is totally accessible. Your unique needs will drive the way Greentree and its partners respond to you. If the only thing missing from this equation is your business, then get in touch – after all, three heads are better than one.

GET READY TO BE PRIMED FOR BUSINESS.
